What to do in our subgroup?

EFPT situation in partner countries

- No education program for Equine Facilitated Physiotherapists
 - People have horses and decide they can do therapy with no education and no inspection to check their quality of expertise
 - On the other hand in the group is long experience in EFPT work and long experience having Education for EFTherapies or EFPT
-

Solutions ? Goals

From 1. Subgroup meeting + WhatsUp discussion

- **European Educational roof organization ? EEFTN?** to give a licence to educate (= that shows that you are competent to pass the knowledge on this field and gives permission to teach. These teachers stand behind same regulations and standards. Roof organization for guidelines for education, teaching program?
- people go out for the formation eg **HETI?** = to have more power behind
- How to educate people to EFPT?
- Help to have the **knowledge** how to work on EFPT, then create a teaching programme for us?
- Want to **create Equine Facilitated Therapy Education for only Medical Rehabilitation**
- Follow our example from Finnish development of Education and **invite teachers from other countries** and then create own education based on “foreign model”
- **Co-operation with Physiotherapy Association and University:** In Norway we have had various programs and teachers, all organised through the Norwegian Physiotherapy Association.

What we have done? Two meetings + next 1.3.22

What to teach?

- We look more closely EFPT Competences document- 2 presentations of client's positions **on the horse** (and exercises)- New idea: together formulate a presentation of the topic
- This is a way to "Help to have the knowledge how to work on EFPT, then create a teaching programme for us"?

Who can teach?

survey/ google forms?

What kind of educational level the EFT courses are?
